DENTURE CARE SYSTEM

Congratulations on your purchase of **fittydent**. The **fittydent** Denture Care System has been developed in close collaboration with dentists and universities to solve all of your denture problems.

fittydent is the only Denture Adhesive that is non water-soluble. This means **fittydent** will not wash away when eating or drinking. **fittydent** provides an extremely strong bonding effect that assures the denture will be fixed to the gum all day long. And there's no slipping or sliding. You'll enjoy a completely new and natural denture feeling!

And **fittydent** is absolutely zinc free*!

*Super Adhesive for
Dentures*

*Super Denture
Adhesive Cushions
for Lower Dentures*

*Super Cleansing
Tablets*

* Most of the denture creams contain zinc. Chronic, excessive intake of zinc may result in serious neurological disease. This is the conclusion of the study "Denture cream: an unusual source of excess zinc, leading to neurological disease" published in Neurology 2008.

Feel Secure All Day Long With *fittydent*

DENTURE ADHESIVE

Directions for Use:

1. Clean and dry your dentures thoroughly. **fittydent** can only develop its full adhesive power when the dentures are completely dry.
2. Apply **fittydent** to your dentures by squeezing the tube slightly. Warm the tube in hand if it is cold to let the adhesive come out easily.
3. Apply **fittydent** to your dentures in strips (as shown in the diagram), making sure that the adhesive is not too close to the edge of the denture.
4. To avoid clogging, close tube tightly immediately after use.
5. Insert dentures into mouth and bite firmly.
6. For best result wait 15 min. before eating or drinking.

Helpful Hints:

- It may take a few trials to see what amount of **fittydent** adhesive is ideal. First begin by using a small amount. Increase as needed to achieve a long lasting bond.
- If you wish an even stronger bond, spread adhesive to create a thin and even layer over the entire contact area.
- If at the end of the day the bonding effect has not lessened, simply leave dentures in the mouth overnight. Apply less adhesive next day.
- For sensitive gums, a mild tingling or burning sensation may be felt occasionally. It will pass by quickly and is absolutely harmless. To avoid the tingling or burning sensation spread the adhesive to create a thin and even layer. Wait a few seconds before inserting the denture.
- Use **fittydent** Cleansing Tablets regularly to thoroughly clean dentures.
- Soft liners might reduce bonding effect.
- Consult your dentist regularly to ensure proper fitting dentures.

Composition: Sodium Carboxymethylcellulose, Solution of Polyvinylacetate, Petrolatum.

DENTURE ADHESIVE CUSHIONS FOR LOWER DENTURES

Directions for use:

1. Clean and **dry** your lower denture thoroughly before applying **fittydent** Adhesive Cushion.

2. Remove the foil on both sides of cushion before using. To easily remove the foil, bend cushion slightly.

3. Apply the cushion inside the lower denture and press firmly in place. Gently smooth out any air bubbles.

4. If necessary, trim cushion with scissors to fit denture.

5. Insert denture into mouth and bite firmly. For best results, wait 15 minutes before eating or drinking.

Helpful Hints:

- For sensitive gums a mild tingling or burning sensation may be felt occasionally.
- Use **fittydent** Cleansing Tablets regularly to thoroughly clean dentures.
- **fittydent** Adhesive Cushions are not intended to use with soft lining dentures.
- Consult your dentist regularly to ensure proper fitting dentures.

Ingredients: Polyvinylacetate, Sodium Carboxymethylcellulose, Glycerintriacetate, Petrolatum.

CLEANSING TABLETS

Direction for use:

Remove your dentures and brush them under running water with a toothbrush.

Drop half or one tablet into warm water.

Soak denture or brace in the solution for at least 5 minutes. For best results, use once a day. Your dentures or braces may be safely soaked in the solution overnight.

Rinse denture or brace under running water. Dry denture thoroughly before applying **fittydent** Denture Adhesive or Cushions.

**Caution: Keep tablets out of reach of children.
Do not put tablets in mouth.**

Ingredients: Sodium Perborate, Sodium Bicarbonate, Potassium Monopersulphate, Trisodium Phosphate, PEG-240, Sulphamic Acid, PVP, TAED, Silica, Sodium Methyl Oleoyl

Taurate, Cellulose-Lactose, Colour C.I. 42090, Aroma

Store at room temperature!
