

## Simple and Safe Care for Dentures

Bones in your mouth will change over time. Regular check ups by your dentist are necessary. Your dentist will examine your mouth and your dentures, check the fit and make any necessary adjustments. In addition to these routine dental visits, daily care at home will help prevent oral problems.

## Daily Cleaning of Your Denture at Home

Plaque can form on dentures, like on natural teeth. If it is not removed every day, it threatens the health of your whole oral cavity. It causes:

- bad odour
- bad looking dentures
- gingivitis and more serious periodontitis which results in greater risk of heart disease
- cavities in adjoining teeth

It is highly recommended that denture wearers clean their dentures regularly by using e.g. **fittydent** Super Denture Cleansing Tablets and see their dentist regularly to maintain good oral health.

## fittydent Super Adhesive for Dentures Non Water-Soluble

**fittydent** is the only Denture Adhesive worldwide that is non water-soluble. This makes it differ from conventional adhesives.

- **fittydent** will not wash away when denture wearers are eating or drinking.
- Dentures hold longer and stronger in the mouth.
- No denture adhesive residues will leak into the stomach.

Due to intensive flow of saliva around the lower jaw, the non water-soluble properties of **fittydent** are especially important in keeping lower denture well in place.

**fittydent** assures that dentures will be fixed to the gum all day long. Denture wearers will enjoy a completely new and natural feeling.

The use of **fittydent** Denture Adhesive is therapeutically beneficial.\*)

## fittydent Super Denture Adhesive Cushions for Lower Denture Problems

- Guaranteed solution for patients with flat and narrow lower jaws.
- Assure a secure, strong bond between the lower denture and gum in the most difficult cases.
- The cushions are non water-soluble, therefore they are also effective for patients with excessive saliva.

## fittydent Super Cleansing Tablets

- Cleans and whiten full dentures. Removes easily and thoroughly all non water-soluble residues of **fittydent** Denture Adhesive and Cushions.
- Cleans and whitens partial dentures. Protects the metal part of partial dentures.
- Perfect hygiene for all orthodontic appliances. The unique pH9 formula prevents them from corrosion.
